Advanced Inspection Manager

Advanced Inspection Manager *harnesses proven AMS technology to conduct, manage and track Loss Control Inspections. AIM works in conjuction with the Inspection Plus, the field application, providing extensive exposure information. Clients have the ability to track, distribute and receive inspections from inspectors and fee service companies. The system collects critical managerial information on all inspections in the field. Offering information on scheduling, survey status, inspector inventory and time service.*

FEATURES:

- ✓**Secure upload and download of inspections to and from the field**
- ✓**Allows viewing and printing of inspections on-line**
- ✓**Provides on-line workload balancing between inspectors**
- ✓**Extensive diagnostics, logging and support**
- ✓**Provides scheduling, status, inventory and time service reports**
- ✓**Provides secure system of inspection archiving**
- ✓**Provides a paperless way of tracking and storing inspections**
- ✓**Enables B2B communications between carriers and fee service companies**

AIM *communicates with* ***Inspector Plus****, the field application, to manage the complete Loss Control Inspection process. Upon completion, inspections are then uploaded with all completed forms, photos and scanned documents that are part of the Loss Control file for that insured.*
