

Inspector Plus

Inspector Plus, the field piece of the Advanced Inspector Manager (AIM) puts control of the exposure information in the hands of the field engineer. Working as a stand alone or in conjunction with AIM, the ability to electronically gather and collect comprehensive exposure detail is now available. Create a streamlined uniform process for the generation, completion of forms, and recommendations. Full support for all lines of business, regardless if it is commercial or personal.

FEATURES:

- ✓ Collect comprehensive exposure information, including Risk Impression
- ✓ Capture photos, copies, reports, forms and diagrams from each location
- ✓ Constant communication between field and office
- ✓ Ease in scheduling, re-scheduling inspections and future re-occurring inspections
- ✓ Allows you to create and use YOUR OWN inspection forms
- ✓ Quick, consistent inspection form completion
- ✓ Upload complete survey file for immediate underwriter access and review
- ✓ Prioritize inspection requests

Inspector Plus allows the inspector to receive all requests, schedule them out according to their prioritization and run filters on all current inventories. Inspector Plus creates uniformity and greater efficiencies for the inspector in the field. This field system works in conjunction with our existing Field Manager product for coordinating inventories, itineraries, scheduling, backup and recovery, printing, inspection request receive and transmit, and error logging.
